How to Add a Standard Citation to Zotero

Citations for standards may have to be entered manually. From your Zotero folder, choose the New Item icon. From its list, you will see that there is no template for Standards. Instead, choose Patents as the item type.

In the Info pane enter the Standard’s information as follows. This will work when using the IEEE citation style.

Examples:

   
   Title field = IEEE Criteria for Class IE Electric Systems
   Patent Number field = IEEE Standard 308
   Issue date field = 1969

   
   Title Field = Letter Symbols for Quantities
   Patent Number field = ANSI Standard Y10.5-1968
   There is no need to fill out the issuing date field since the year is already included in the Standard number.
