How to Import QCAT Citations into Zotero (Firefox browser)

From your list of QCAT results, look for the folder icon at the top right of your browser window:

Once you click on the folder icon, it will generate a list of the QCAT results from that page. Click beside the citations you would like to add to your Zotero collection. Then click OK.
You will now see the chosen citations in your Zotero library. Any corrections may be made to the citation metadata in the right-hand pane. Always check the Info pane to make sure the metadata is complete.
